SAN FRANCISCO AGENCY. Mr. Thomas Boyce is the only authorized agent for the MINER in San Francisco. All orders left at his office, northeast corner of Washington and Montgomery streets, (up stairs) will be promptly attended to.

Some one has beautifully said: "Truth is immortal; the sword cannot pierce it, fire cannot consume it, prisons cannot incarcerate it, famine cannot starve it."

When the ladies of the court of Sweden had finished hugging and kissing Admiral Farragut, they each and all exclaimed, "ferry good."

A HARD-HEARTED contemporary speaks of Mrs. Lincoln's wandering as the "widow's cruise."

On one branch of the Madison river, in Montana, the hot springs may be counted by hundreds, and some of them are geysers, or spouting wells, of a very high temperature. This stream used to be called the "Fire Hole River." The Stinking Water River derives its name from a large spring of sulphureted hydrogen near its source.

Europe is at peace, yet her armies number two hundred thousand men, and in time of war, the effective force would be five million.

The capital invested in railway enterprises in the United States is somewhere near two thousand millions of dollars, and the amount is rapidly growing larger from year to year. The Pacific railways will add one hundred and fifty millions within the next five years, and new lines and the extension of the present lines will probably add as much more to this great interest within that time.

The last mile of track of the Union Pacific Railroad, into Cheyenne, was laid in one hour.

Mr. Hamill, the great oarsman, is a gentleman and a sculler.

In a graveyard in La Grange, Tennessee, there is said to be a tombstone bearing this inscription:

"Here lies old twenty per cent;  
The more he got the less he spent;  
The more he got, the more he craved;  
If he goes to heaven, we'll all be saved."

"I wonder how they make lucifer matches?" said Mrs. Caudle. "The process is very simple," said Mr. Caudle; "I once made one." "How did you manage it?" she asked. "By leading you to the altar," replied Caudle.

Seventy thousand nine hundred and thirty oil wells have been sunk in the United States since the year 1861, and have yielded a total product of about 11,649,676 barrels of crude petroleum.

It is said that the Indians have tried their new Government revolvers and scalping knives, and pronounce them about the right thing.

Three months experience in journalism cost the proprietors of the Brooklyn Press \$40,000, after which they gave up the postime.

A RAILROAD bridge is being built across the Missouri river, at Kansas City, and it is stated that the sum of \$300,000 has already been expended upon it.

In Iceland, the clergyman kisses his congregation all around before preaching.—*Ex.* That's what we call freezing assurance on the part of the Icelandic clergy.

A MOBILE paper nominates Franklin Pierce for the Presidency.

An editor, describing the bonnets now in fashion, says: "They have a downward slant that reminds one of a vicious cow with a board across her face."

GEO. D. PRENTICE says of Fitz Greene Halleck, just dead: "His soul was a thing of eternal beauty and music and sunshine."

The Maysville (Ky.) *Republican* has the following: "Married, Oct. 21, by Rev. E. D. Isbell, in Scott county, John R. Corbin, aged 83 years, and Mrs. Sarah Simpson, aged 73 years."

Old, but adventuresome.

As the afternoon way-train was coming from Baltimore, recently, the conductor, calling out the names of way-stations, shouted out in explosive tones:

"Jesup's Cut!"

"Was he hurt much?" inquired a demure looking passenger.

Whereupon there was a general snicker, and the conductor, proceeding to another car, called out, in a lower key, "Jesup's Cut!"

The new elevated railroad in Greenwich street, New York, has been completed for a quarter of a mile from the Battery.

TO MEND UNDER MOUTH-PIECES.—Smear the surface of the broken pieces with boiled linseed oil, and hold them over the mild heat of a charcoal fire, pressing the parts well together, till the lute becomes hard and solid. A knowledge of this secret might save the pocket of the "knight of the moerschbaum" enough to keep him in tobacco a month.

Dr. Crosby, of New Haven, the man who invented the machine for making pins has perfected another which turns out a perfect needle without touch of a human hand, except in the tempering of the wire. The American Fish-hook Company of that city of which he is president, uses an invention of his which drops a hundred perfect fish-hooks each minute into a pail at one end from a coil of wire at the other.

ITS SITUATION.—Somebody asked the editor of the *Mississippi* the latitude and longitude of Vicksburg. He answered:

"Vicksburg is the parallel of Military Despatch, and thereby exposed to a high old African heat. Its longitude may be calculated by observing the long faces of the Radicals, since hearing the result of the late elections."

PRENTICE, in speaking of Thurlow Weed, says: "You ought, if your ancient joints are not too rheumatic or gouty, to go down on all-fours with a file of your paper under your drooping mouth and lick out your slanders. Before a hundredth part of the licking could be done, your poisonous tongue would wear out, and that's just what ought to be."

Now Equal to Any Journal Published on the Pacific Coast.

It stemmed the torrent of bigotry, intolerance and persecution, fearlessly bearing up to the Democratic Excesses through the dark period of our country's misery, until victory was achieved and the principles it battled for were triumphant. To do this it incurred a very heavy expenditure, which, however, was cheerfully borne under its confident belief that the opportune time would come when the party would reimburse us by contributing generously its patronage. That time has now arrived, and we ask Democrats to do their part in sustaining this
